***Til Faith Do Us Part:
How Interfaith Marriage is
Transforming America***
by Naomi Schaefer Riley

Our discussions this summer will use this fascinating book as a **starting point** to look at an issue that affects everyone - an issue that is not often talked about prior to marriage and yet is a powerful component of marriage.

In the last decade, 45% of all marriages in the U.S. were between people of different faiths. The rapidly growing number of mixed-faith families has become a source of hope, encouraging openness and tolerance among religious communities that historically have been insular and suspicious of other faiths.

Yet, what is good for society as a whole often proves difficult for individual families. Couples tend to marry in their twenties and thirties, a time when religion diminishes in importance, only to return to faith as they grow older and raise children, suffer the loss of a parent, or experience other major life challenges. Even when they recognize deeply held differences, couples believe that love conquers all. As a result, they fail to ask the necessary questions about how they will reconcile their divergent worldviews about raising children, celebrating holidays, interacting with extended families, and more.
